I am writing to apply for the Inpatient Claims Processor I position at Moda Health. Your company's long-standing commitment to quality healthcare and community support in Oregon is impressive, and I would be proud to contribute to your mission of building a better future for healthcare.

My professional background is in software engineering, where I have developed strong analytical and problem-solving skills through building complex web applications and systems. I am accustomed to reviewing data carefully, identifying discrepancies, and resolving issues methodically. These skills translate directly to the claims processing environment, where accuracy and attention to detail are essential.

In previous work, I have consistently met production deadlines and quality standards while managing multiple priorities. I am comfortable working independently in a remote setting, navigating multiple software systems simultaneously, and maintaining focus during repetitive tasks. I also have experience communicating clearly with both technical and non-technical stakeholders, which will help me collaborate effectively with internal departments and external providers.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application. I look forward to the possibility of contributing to Moda Health's claims processing team.

Sincerely,

Md Shahanur Islam Shagor
