I am writing to apply for the Coach Psicologo Online role at Serenis. Your mission to combine technology with mental health support is meaningful, and I am interested in contributing to a platform that prioritizes user well-being through thoughtful engineering.

My professional experience as a Full-Stack & AI Engineer has focused on building secure, scalable web applications. I have worked extensively with Laravel and Next.js to develop platforms that handle user authentication, real-time communication, and role-based access control. These are the same technical foundations that support sensitive user-facing services like digital health platforms.

In previous work, I have built and maintained RESTful APIs, integrated third-party services, and deployed applications on Linux servers with Docker and Nginx. I have also implemented features such as payment gateways, real-time notifications, and multilingual support. This experience has given me a strong understanding of how to build reliable systems that serve diverse user bases.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
