I am writing to apply for the Mitarbeiter (m/w/d) Kundenbetreuung & Datenerfassung position at Dein-Finanzmanagment. Your focus on helping individuals track expenses and identify savings opportunities aligns with my interest in building systems that bring clarity and structure to everyday processes.

Through my professional experience as a Web Developer, I have developed a reliable and organized approach to managing data, maintaining records, and supporting client-facing operations. I am comfortable working with digital applications and databases, which allows me to handle data entry tasks accurately and efficiently.

One area that particularly interests me is the combination of structured data management with direct client support. In previous roles, I worked with client information systems, maintained accurate records, and supported appointment preparation and follow-up tasks. These experiences have given me a practical understanding of how careful data handling and clear communication work together to support client relationships.

In addition to my technical experience, I work effectively across teams and communicate clearly with both technical and non-technical colleagues. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my skills can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
