I am writing to apply for the Marktleitung (m/w/d) im Getrˆnkehandel position at GPG Getrˆnke GmbH. While my professional background is in software engineering, I bring strong leadership, organizational, and communication skills that are directly applicable to managing a retail operation.

In my previous role as a Web Developer, I was responsible for leading the delivery of full-stack web applications. This involved coordinating with stakeholders, planning development sprints, managing timelines, and ensuring that each project was completed on schedule and to specification. I regularly took ownership of the full project lifecycle, from initial requirement gathering to deployment and post-launch support.

One area that particularly interests me is the opportunity to lead a team and drive operational excellence. At Explo-IT, I worked closely with cross-functional teams, communicated technical decisions to non-technical stakeholders, and ensured smooth collaboration between developers, designers, and business leads. I am comfortable taking responsibility for outcomes, motivating team members, and maintaining high standards of quality.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my leadership experience, problem-solving mindset, and ability to manage complex workflows will allow me to contribute effectively as a Marktleitung. I have attached my CV for your review and look forward to the opportunity to discuss how I can support your team in Bochum.

Sincerely,

Md Shahanur Islam Shagor
