I am writing to apply for the Energieberater / Projektingenieur Energieeffizienz Wohngebˆude position at EcoEnergineers GmbH. Your focus on energy consulting, building physics, and efficient building concepts for residential properties aligns with my interest in applying structured technical thinking to real-world sustainability challenges.

While my professional background is in software engineering and system architecture, I bring strong analytical capabilities, experience with technical documentation, and a structured approach to problem-solving. I have worked on projects that required precise calculations, data analysis, and clear reporting. These skills translate directly to the technical and documentation requirements of energy consulting.

In my previous work as a Web Developer, I collaborated with architects, project managers, and clients to deliver complex systems on time. I am comfortable preparing technical documents, coordinating with multiple stakeholders, and ensuring that all requirements are met with accuracy and attention to detail. I am also experienced with CAD tools and 3D modeling, which I have used in system design and visualization.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to contribute to your team’s work on energy-efficient building concepts and COâ reduction. I have attached my CV for your review and would welcome the opportunity to discuss my application further.

Sincerely,

Md Shahanur Islam Shagor
