I am writing to apply for the Teamlead CRM (Marketing) position at PERRCON job network. The opportunity to lead data-driven CRM campaigns in a consumer-focused environment aligns well with my technical background and interest in building systems that drive measurable results.

Through my professional experience as a Web Developer, I have developed full-stack applications using Laravel, Next.js, and MySQL. This work involved analyzing user data, building segmentation logic, and implementing personalized features to improve engagement. I am comfortable working with performance metrics and using data to guide decision-making.

One area that particularly interests me is the cross-channel nature of CRM work. In previous projects, I have built systems that integrate with multiple platforms, manage user journeys, and automate communication flows. I understand the importance of thinking from the customer's perspective and designing campaigns that feel relevant and timely.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my experience can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
