I am writing to apply for the Factory IT-Support position at Flora Food Group. Your company's focus on producing natural and sustainable food products at scale is impressive, and I am interested in contributing to the IT operations that support your production facility in Wittenberg.

Through my professional experience, I have developed a solid understanding of IT infrastructure, including Linux servers, network configuration, and application maintenance. I have worked with Nginx, Apache, Docker, and CI/CD pipelines to ensure stable system operations. I am comfortable managing server updates, backups, and monitoring to maintain high availability in production environments.

One area that particularly interests me is supporting end-users and coordinating with service desks to resolve tickets efficiently. In my previous roles, I provided direct technical support to colleagues, managed issue tracking, and collaborated with external service providers when needed. I am used to working in teams where clear communication and reliable system uptime are priorities.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can support the IT team at Flora Food Group.

Sincerely,

Md Shahanur Islam Shagor
