I am writing to apply for the Delivery Director for Germany & Switzerland position at VALIANTYS. Your focus on transformation consulting, enterprise service management, and engineering productivity aligns with my own experience in delivering complex technical projects and driving operational improvements.

What stands out to me about VALIANTYS is the emphasis on combining deep process expertise with modern collaboration and automation to help organizations transform how work gets done. This approach resonates with my background in building scalable systems and improving delivery workflows.

Through my professional experience as a Web Developer, I have delivered full-stack applications while managing client engagements, defining scope, and ensuring projects met quality and financial objectives. I have worked closely with cross-functional teams including consulting, sales, and engineering to align delivery with business goals. I am comfortable overseeing resource allocation, monitoring performance, and driving continuous improvement.

I also bring a practical awareness of AI in the enterprise. I have built AI-powered features into production applications, including intelligent assistants and automated workflows, and understand how AI can create measurable value for clients. My technical foundation includes Laravel, Next.js, React, Node.js, Docker, and cloud deployment on AWS and Google Cloud.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my experience can contribute to VALIANTYS delivery excellence in Germany and Switzerland.

Sincerely,

Md Shahanur Islam Shagor
