I am writing to apply for the Social Media Manager position at scanmetrix.fm GmbH. Your work in digitizing the daily operations of craftsmen and facility management through a modern PropTech platform is genuinely interesting, and I would welcome the opportunity to contribute to your team.

Although my professional background is in software engineering, I bring strong creative and design capabilities that align well with this role. Through my work building full-stack web applications, I have developed a sharp eye for visual design, layout, and user experience. I regularly use tools like Figma and Tailwind CSS to create polished, engaging interfaces, and I understand how to produce content that captures attention and communicates clearly.

I am comfortable working independently and taking ownership of projects from start to finish. In previous development work, I have planned, executed, and delivered complete features without requiring constant supervision. I approach tasks with a high degree of self-initiative and a focus on practical results.

In addition to my technical and design experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would be glad to discuss how I can contribute to scanmetrix.fm GmbH and help strengthen your social media presence.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
