I am writing to apply for the Mitarbeiter Qualitˆtssicherung position at K-tronik GmbH. Your work in the energy sector and the emphasis on quality documentation, standards compliance, and customer coordination caught my attention.

Through my professional experience as a software engineer, I have developed strong skills in documentation, validation, and systematic quality control. I have independently reviewed technical documents, verified data integrity, and ensured compliance with project specifications. My background includes creating detailed quality documentation and monitoring processes to maintain high standards.

In previous roles, I worked closely with cross-functional teams, including clients and external inspectors, to ensure products met required specifications before delivery. I am comfortable taking ownership of documentation workflows, coordinating with stakeholders, and communicating clearly in both technical and non-technical contexts.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my attention to detail, independent work style, and experience with documentation and quality processes would allow me to contribute meaningfully to your team. I have attached my CV for your review and would welcome the opportunity to discuss how I can support K-tronik’s quality assurance efforts.

Sincerely,

Md Shahanur Islam Shagor
