I am writing to apply for the Werkstudent:in Buchhaltung position at RePower Solution GmbH. Your work in renewable energy and sustainable technology is genuinely interesting, and I appreciate the focus on practical impact rather than just theory.

My background is in software engineering, where precision, structure, and reliability are essential. Through my studies and project work, I have developed a strong ability to handle data accurately, manage workflows systematically, and maintain attention to detail even under pressure. These habits translate directly into accounting and finance support tasks.

In previous work, I built full-stack applications that required careful data management, transaction processing, and reconciliation logic. I am comfortable working with numbers, tracking records, and ensuring completeness in every step. I am also experienced with digital tools and can quickly adapt to new software, including modern Buchhaltungstools.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am currently enrolled in a Software Engineering program and looking for a practical role where I can contribute while learning. I have attached my CV for your review and would welcome the opportunity to discuss how I can support your finance team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
