I am writing to apply for the Senior IT Projektmanager SAP position at Recruit 121 Group. The role's focus on guiding SAP projects from acquisition through successful delivery, combined with your emphasis on a collaborative and people-centered culture, aligns with my approach to project management.

Through my professional experience in software development, I have developed a structured and organized approach to managing projects. I have supported project and sub-project leadership by coordinating timelines, monitoring milestones, and maintaining thorough documentation. My work has involved acting as a reliable point of contact for clients and external partners, ensuring clear communication and alignment throughout the project lifecycle.

One area that particularly interests me is the opportunity to contribute to S/4HANA implementations and transformations. While my direct experience is in web application development, the core project management skills I have builtâ coordinating cross-functional teams, managing resources, and delivering on scheduleâ are directly transferable. I am comfortable working with agile methodologies and modern project approaches to keep initiatives on track.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project management experience can contribute to your team.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
