I am writing to apply for the (Senior) Business Development Manager position at Patronus. Your mission to make the daily lives of seniors safer and more independent through intelligent technology is genuinely impactful. I am drawn to the opportunity to build scalable partnerships and drive growth in a healthtech startup that creates real societal value.

My background is in software engineering, where I have spent over four years delivering full-stack web applications and working directly with product, sales, and leadership teams. In my most recent role at Explo-IT, I was responsible for structuring projects from concept to delivery, collaborating with stakeholders to identify growth opportunities, and building systems that supported business scalability. This experience taught me to work iteratively, prioritize effectively, and focus on measurable outcomes.

One area where I have consistently contributed is in building and scaling partner ecosystems. While developing a multi-vendor e-commerce platform, I designed role-based systems that coordinated customers, sellers, and logistics teams, requiring clear communication and structured workflows across different stakeholder groups. This project gave me hands-on experience in identifying operational gaps, designing scalable processes, and driving initiatives from planning to execution.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in building scalable systems and driving growth initiatives can contribute to Patronus’s continued success.

Sincerely,

Md Shahanur Islam Shagor
