I am writing to apply for the Profesor a de Dibujo Modalidad Remota position at TUS Media. While my professional background is in software engineering and AI, I bring strong communication skills, a structured approach to teaching, and a genuine interest in helping others learn.

In my previous roles as a web developer, I regularly mentored junior team members and explained technical workflows to non-technical stakeholders. I learned that clear, patient communication and the ability to break down complex topics into simple steps are essential for effective teaching. I apply the same mindset to any subject I teach.

I am a quick learner and problem solver by nature. I am confident I can quickly develop the drawing curriculum and adapt my teaching style to meet the needs of remote students. I am comfortable using digital tools for remote instruction and can create engaging, structured lessons.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my teaching approach and communication skills can contribute to TUS Media.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
