I am writing to apply for the Graphic Narrator position at Resilient Solutions Plus, LLC. Your focus on transforming ideas and data into compelling visual narratives aligns with my experience in building user-facing platforms that communicate complex information clearly.

While my primary expertise is in software engineering, I have consistently worked at the intersection of design and technology. Through hands-on project development, I have created responsive interfaces, infographics, and data visualizations using tools like Figma, Tailwind CSS, and React. I understand composition, typography, and layout design, and I apply these principles to ensure visual content is both engaging and functional.

One area that particularly interests me is the use of AI-assisted design tools and digital publishing platforms. I have integrated AI features into web applications, including image processing and automated content generation, which gives me practical insight into how technology can enhance visual storytelling workflows.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
