I am writing to apply for the Leitung Servicezentrum Informationssicherheit position at Hochschul-IT-Services.nrw. The opportunity to shape the information security framework for universities across NRW, working at the intersection of strategy, coordination, and technical implementation, is exactly the kind of challenge I want to take on.

My work has consistently focused on building secure, resilient systems. Through research and development, I designed OmniGuard V2X, a privacy-preserving blockchain framework for autonomous vehicle networks that integrates Zero-Knowledge Proofs and post-quantum cryptography to protect data integrity and anonymity. This project required deep thinking about threat models, cryptographic guarantees, and decentralized trust architectures. I also developed a real-time server health monitoring dashboard with role-based access control and secure authentication, ensuring only authorized users could access sensitive system metrics.

What stands out to me about this role is the chance to move beyond individual system security and help build a unified information security framework for 36 universities. The responsibilities around developing BSI-standard-compliant ISMS, advising institutions on cybersecurity strategy, and coordinating working groups across ministries and academic stakeholders align with my experience in cross-functional collaboration and technical communication. I am comfortable translating complex security concepts into actionable guidance for diverse audiences.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in cybersecurity, secure systems, and technical coordination can contribute to SISB.nrw and the broader digital infrastructure of NRW’s universities.

Sincerely,

Md Shahanur Islam Shagor
