I am writing to apply for the Werkstudent Facility Management position at TIGER Deutschland GmbH. Your description of a role where someone takes ownership of coordination, analyzes situations, and brings structure to workflows resonates with me. I am currently a Software Engineering student at Voronezh State University of Forestry and Technology, Russia, and I am looking for a working student position where I can contribute meaningfully rather than just observe.

What stands out to me about this role is the emphasis on independent thinking and responsibility. You are looking for someone who wants to think along, take ownership, and truly make a difference. That matches my approach to work. In my previous professional experience as a web developer, I was responsible for coordinating with stakeholders, managing task priorities, and ensuring transparent communication across teams. These experiences have prepared me to handle the coordination and documentation tasks described in this position.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am based in Voronezh and willing to relocate to Cologne for this on-site position. I am available for 16-20 hours per week and can adapt my schedule around my studies. I would welcome the opportunity to discuss how I can contribute to your team.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
