I am writing to apply for the Werkstudent Performance Marketer position at BrainersHub GmbH. Your focus on hands-on campaign work in the healthcare sector and long-term development of student talent aligns well with what I am looking for in a working student role.

Although my primary background is in software engineering, I bring a strong analytical and data-driven approach that is directly relevant to performance marketing. Through my web development work, I have built systems involving user engagement tracking, content management, and real-time data monitoring. These experiences have trained me to interpret metrics, identify patterns, and make data-informed decisions.

One area that particularly interests me is campaign monitoring and optimization. In previous projects, I have implemented features that track user interactions and generate performance reports. I am comfortable working with analytics tools, interpreting key performance indicators, and using data to guide improvements. I am eager to apply this analytical mindset to social media campaigns, Google Ads, and other performance marketing channels.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am a quick learner with a hands-on mentality, ready to take responsibility from day one. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your team.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
