I am writing to apply for the YouTube-Strategе & Skript-Autor position at TՇglichTechnik. The opportunity to help a company grow its YouTube presence by turning complex technical topics into compelling, watchable content aligns directly with how I approach communication in my own work.

As a full-stack and AI engineer, I regularly explain intricate systems, architectures, and technical decisions to both technical and non-technical audiences. Whether documenting API workflows, writing project overviews, or presenting research findings, I focus on clarity, structure, and engagement. I understand that a strong hook, clear pacing, and thoughtful storytelling are what separate content that gets watched from content that gets scrolled past.

What stands out to me about this role is the emphasis on making complex topics simple without making them shallow. That is a balance I work hard to maintain in everything I build and write. I am comfortable analyzing performance metrics and using them to refine both strategy and execution. I also enjoy thinking about packaging, including titles, thumbnails, and hooks that drive CTR and watch time.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would be happy to share writing samples. I look forward to the possibility of contributing to TՇglichTechnik’s YouTube growth.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
