I am writing to apply for the Video Editor/Cutter position for YouTube at T^glichTechnik. Your approach to making complex topics accessible and engaging through well-crafted video content is something I find genuinely interesting.

Although my primary career path has been in software engineering, I have developed a solid understanding of what makes YouTube content work effectively. I understand the importance of hooks, pacing, and watchtime, and I have experience structuring content to maintain viewer attention from start to finish.

What I bring to this role is a strong sense of timing, flow, and storytelling. I enjoy working with raw footage and shaping it into something polished and engaging. I am comfortable with 2D animation concepts and have an eye for clean, modern edits that feel dynamic without being distracting.

In addition to my technical background, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am a quick learner who works independently and is eager to dive into new topics. I would be happy to share work samples as requested. I have attached my CV for your review and look forward to hearing from you.

Sincerely,

Md Shahanur Islam Shagor
