I am writing to apply for the Tracking Spezialist Google Ads position at Die SEA-Experten GmbH & Co. KG. Your focus on conversion tracking, GA4, and Google Tag Manager aligns with my technical background in building and debugging complex web systems.

Through my professional experience as a Web Developer, I have worked extensively with web technologies including JavaScript, TypeScript, and various backend frameworks. This has given me a strong understanding of how data flows through web applications, how events are triggered, and how to implement and verify tracking mechanisms. I am comfortable working with dataLayer structures, event configurations, and debugging tools to ensure data accuracy.

One area that particularly interests me is the challenge of diagnosing and resolving tracking issues. In my previous work, I regularly debugged API integrations, data pipelines, and third-party service connections. I approach problems methodically, isolating variables and testing systematically until the root cause is found. This structured approach would serve me well in identifying and fixing tracking discrepancies in Google Ads, GA4, and GTM setups.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
