I am writing to apply for the Betriebswirt (m/w/d) position at Desch Digital GmbH. Your focus on helping tax firms digitize their processes, improve profitability, and operate more strategically is a challenge that aligns well with my analytical and systems-oriented approach.

Although my professional background is in software engineering, the core of my work has always been about understanding complex operational workflows, identifying bottlenecks, and designing structured improvements. I have spent years analyzing how systems and people interact, and translating those observations into practical, measurable changes. This analytical and solution-oriented mindset is directly applicable to the strategic consulting work your team does with partner tax firms.

In my experience delivering full-stack web applications, I worked closely with business stakeholders to understand their daily challenges and goals. I regularly conducted analysis of their existing processes, developed concrete action plans, and implemented solutions that improved efficiency and clarity. This required clear communication, structured preparation, and the ability to follow through on commitments without dropping details.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my structured work style, analytical thinking, and ability to drive process improvements would make me a strong addition to your team. I have attached my CV for your consideration and look forward to the possibility of contributing to Desch Digital’s mission.

Sincerely,

Md Shahanur Islam Shagor
