I am writing to apply for the Kundenberater (m/w/d) position at Desch Digital GmbH. Your focus on helping tax firms digitalize their processes and improve client acquisition aligns with my own interest in using technology to solve practical business challenges.

Although my professional background is in software engineering, the core of my work has always been client-facing and solution-oriented. In my role as a Web Developer, I regularly conducted 1:1 meetings with stakeholders to understand their operational pain points, discuss requirements, and collaboratively develop solutions that worked in their daily workflows. This experience taught me how to listen carefully, ask the right questions, and ensure that recommendations translate into real-world action.

What stands out to me about Desch Digital is your structured approach combining 1:1 consulting, a dedicated training platform, and community support. I am comfortable preparing thoroughly for client meetings, following up systematically, and adapting my communication style to different audiences. I also enjoy contributing ideas to improve service offerings based on direct client feedback.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your team in Hamburg.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
