I am writing to apply for the Hˆ¶rakustiker im Innendienst position at DHG Deutsche Hˆ¶rakustik GmbH. While my professional background is in software engineering rather than hearing acoustics, I bring a strong foundation in structured data management, documentation, and process optimization that directly supports the core responsibilities of this role.

In my professional experience as a Web Developer, I have worked extensively with data systems, including designing and maintaining databases, building APIs for secure data exchange, and implementing role-based access control. These responsibilities required careful attention to detail, accuracy in record-keeping, and the ability to manage complex workflows. I am confident these skills translate well to handling billing processes, maintaining customer records, and supporting administrative operations.

One area that particularly interests me is the opportunity to contribute to process improvement. In previous roles, I have supported the optimization of internal workflows by identifying inefficiencies and implementing practical solutions. I approach tasks with a structured and precise mindset, ensuring that documentation is thorough and systems remain reliable.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to your team. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
