I am writing to apply for the Werkstudent (m/w/q) KI Kˆ…nstliche Intelligenz Claude position at FREQUENTUM. Your work in helping property managers and energy providers build new business areas around e-mobility, charging technology, and sustainable energy solutions is genuinely interesting. The opportunity to apply AI directly to real-world business processes in this sector is what draws me to this role.

Through hands-on project development, I have built AI-powered systems that combine language models with automated workflows. I developed an AI assistant using OpenAI's latest models, integrated it with a financial application, and connected it to features like voice-to-text transcription, automated email generation, and PDF document creation. This experience directly applies to using Claude for sales processes, automated mailings, and planning tasks.

One area that particularly interests me is building structured databases and connecting them with AI tools. I have worked with MySQL, PostgreSQL, and MongoDB in production environments, and I am comfortable setting up data pipelines that feed into AI-driven workflows. I am confident I can quickly adapt to NoCoDB and help your team build the database infrastructure needed for your projects.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the chance to discuss how I can contribute to FREQUENTUM's mission of bringing innovative AI projects to life.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
