I am writing to apply for the Farmer REMOTO position at ADVBOX. Your mission to make legal services more efficient, human, and digital resonates with my approach to building practical, user-focused software.

With over four years of professional web development experience, I have built full-stack applications using Laravel, Next.js, React, and Node.js. I focus on clean architecture, secure authentication, and responsive interfaces that work well for both users and administrators.

In my previous work, I have developed scalable platforms with REST APIs, role-based access control, payment integration, and real-time features using WebSockets. I have also deployed and maintained applications on Linux servers with Docker and Nginx.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to ADVBOX.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
