I am writing to apply for the SAP Finance Control Consultant role at Recruit 121 Group. While my professional background is in full-stack and AI engineering, I am drawn to the challenge of complex system transformations and the opportunity to work with established consulting firms serving international clients.

My technical foundation includes strong skills in Laravel, React, Node.js, and database systems like MySQL and PostgreSQL. I have experience building scalable web applications, integrating third-party services, and deploying on cloud infrastructure. This background has given me a solid understanding of how enterprise systems are architected, integrated, and maintained.

In my previous work as a Web Developer, I designed and developed RESTful APIs, implemented authentication and role-based access control, and optimized database performance. I also collaborated closely with stakeholders to deliver features on time. These experiences have prepared me to work independently on project modules and communicate effectively with clients.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
