I am writing to apply for the Internship Brand Partnerships & Campaign Management position at Meet5 GmbH. Your platform brings people together through shared experiences, and I find the mission of building meaningful social connections genuinely compelling. I am eager to contribute to your B2B team and learn how successful campaigns are created and managed for well-known partners.

Although my academic background is in software engineering, I have developed strong organizational and communication skills through hands-on project work and team collaboration. I am comfortable working independently, taking initiative, and supporting operational workflows. I enjoy contributing to process improvements and ensuring that tasks are completed reliably and on time.

In previous project work, I have been responsible for coordinating between different stakeholders, managing content updates, and monitoring system performance. These experiences have taught me to work in a structured way, pay close attention to detail, and communicate clearly with team members. I am confident I can apply the same discipline to campaign management, community moderation, and reporting tasks at Meet5.

I am fluent in Bengali and English, with working knowledge of Russian and Hindi. I enjoy collaborating in diverse teams and am motivated to learn from experienced professionals in a startup environment. I am particularly interested in understanding how digital products and social media drive user engagement and brand partnerships.

I have attached my CV for your review. I would welcome the opportunity to discuss how I can support your team during this internship.

Sincerely,

Md Shahanur Islam Shagor
