I am writing to apply for the Senior Project & Account Manager (m/w/d) Performance Marketing position at ADLOCA GmbH. Your description of this role as the central hub connecting Paid, CRM, and Data teams while managing 15 to 20 retainer clients resonates with my experience coordinating complex technical projects across multiple teams and stakeholders.

In my professional experience as a Web Developer at Explo-IT, I managed the full lifecycle of web application projects, balancing priorities across frontend development, backend engineering, and deployment operations. I regularly coordinated between designers, developers, and clients to ensure that expectations, timelines, and deliverables remained aligned. This required the same kind of structured oversight and clear communication that your role demands.

One area that particularly interests me is the emphasis on data-driven decision-making. In my development work, I have built systems that track performance metrics, automate reporting, and surface actionable insights. I am comfortable reading data, identifying patterns, and making decisions based on numbers rather than intuition. I understand the importance of maintaining visibility across a broad portfolio and catching misalignments before they become problems.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am drawn to the opportunity to grow into a leadership role within the agency over the next two years. The chance to help build processes and shape the direction of a growing team is exactly the kind of challenge I am looking for. I have attached my CV for your review and welcome the opportunity to discuss how my experience can contribute to ADLOCA GmbH.

Sincerely,

Md Shahanur Islam Shagor
