I am writing to apply for the Vice President of Growth position at Coduct Solutions GmbH. Your company's focus on cloud-first, AI-driven solutions and scalable service offerings is impressive, and I am interested in contributing to your next growth phase.

My background combines full-stack software engineering with practical AI implementation. I have built and deployed production systems using Laravel, Next.js, and cloud infrastructure on AWS and Google Cloud. I understand how technical capabilities translate into marketable services because I have been involved in the full delivery cycle from architecture to deployment.

In my professional experience as a Web Developer, I worked closely with stakeholders to define requirements, structure deliverables, and ensure that technical solutions aligned with business goals. I have experience building scalable web applications, integrating third-party services, and optimizing performance. This has given me a practical understanding of how software products are positioned, packaged, and delivered to clients.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am interested in the opportunity to help Coduct structure its portfolio and build repeatable go-to-market processes. I have attached my CV for your review and would welcome the chance to discuss how my background aligns with your growth objectives.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
