I am writing to apply for the SAP HCM Consultant position at Gratitude Jobs Ahead HR INC. While my professional experience is rooted in software engineering and full-stack development, I am eager to bring my technical discipline, problem-solving skills, and structured approach to SAP HCM consulting.

Through my work as a Web Developer, I have built and maintained complex systems using PHP, Laravel, and MySQL, with a strong focus on database optimization, role-based access control, and secure API design. These skills translate well into managing and optimizing SAP HCM application landscapes, where structured data handling and system reliability are essential.

One area that particularly interests me is the opportunity to work with PA, PY-DE, and PT modules. My experience with modular system architecture, authentication workflows, and third-party integrations has taught me how to navigate complex enterprise systems and deliver reliable solutions. I am confident I can quickly learn SAP HCM processes and contribute meaningfully to client support and system optimization.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
