I am writing to apply for the Senior Software Developer position at Biga Software GmbH. Your approach to building what customers truly need, combined with clean code standards and a focus on long-term maintainability, aligns closely with how I work.

My technical foundation is built on TypeScript, JavaScript, React, and Laravel, with additional experience across Node.js, Next.js, and Go. I have spent the last several years delivering end-to-end solutions in client-facing projects, where understanding unspoken requirements and translating them into working software has been a core part of my daily work. I write clean, testable code as a standard practice, not as an afterthought.

In my professional experience as a Web Developer, I have owned features from requirement analysis through deployment. I built scalable web applications using Laravel and Next.js, integrated RESTful APIs, implemented authentication and role-based access control, and optimized database performance. I also delivered real-time features using WebSockets and deployed applications on Linux servers with Docker, Nginx, and CI/CD pipelines. Working in small teams, I have regularly participated in code reviews, pair programming, and knowledge sharing.

One area that particularly interests me is how technology evolves and how AI is changing both work and business models. I actively follow these developments and have built AI-powered features into projects, including assistants and image processing pipelines. I enjoy bringing fresh ideas to the table where they create real value for clients.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to Biga Software GmbH.

Sincerely,

Md Shahanur Islam Shagor
