I am writing to express my interest in the SAP Logistik Support Mitarbeiter position at passport Business Engineering GmbH. Your company's focus on delivering smart digital solutions for the food and beverage industry, particularly in logistics, process control, and data management, aligns with my interest in applying technical skills to real-world business operations.

Through my professional experience in web development and IT support, I have developed strong technical problem-solving abilities and a systematic approach to managing applications and supporting users. I have worked with Linux servers, databases, and deployment tools, which provides me with a solid foundation for understanding hosted ERP systems and logistics platforms.

One area that particularly interests me is the opportunity to contribute to the S/4 HANA migration and interface management tasks. In previous work, I have managed application deployments, handled database migrations, and coordinated with team members to ensure smooth system transitions. I am comfortable working with ticketing systems and providing clear, timely support to both internal and external stakeholders.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my technical background and problem-solving skills can contribute to your logistics support team.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
