I am writing to apply for the Mitarbeiter SAP-Support (m/w/d) Logistik & Handel position at passport Business Engineering GmbH. Your client's focus on building efficient systems for the food and beverage industry, including ERP logistics, data management, and process control, aligns with my technical background in full-stack development and IT systems support.

Through my work as a Web Developer, I have built a strong foundation in database management, system integration, and application support. I have worked extensively with MySQL and PostgreSQL, designing schemas, writing optimized queries, and ensuring data integrity across multiple modules. I am comfortable managing Linux servers, troubleshooting application issues, and maintaining reliable system operations. These skills directly apply to supporting hosted logistics systems and managing data flows in an ERP environment.

One area that particularly interests me is the upcoming S/4 HANA migration and interface management. In my professional experience, I have integrated third-party services, managed API communications, and coordinated data exchange between different system components. I have also worked with Docker, Nginx, and CI/CD pipelines to maintain stable deployments. My ability to quickly understand system dependencies and troubleshoot issues would allow me to contribute effectively to migration projects and ongoing support tasks.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I am currently learning German to strengthen my communication in German-speaking workplaces.

I have attached my CV for your review. I would welcome the opportunity to discuss how my technical skills and problem-solving approach can support your logistics and SAP support team.

Sincerely,

Md Shahanur Islam Shagor
