I am writing to apply for the Mitarbeiter SAP-Support (m/w/d) Logistik & Handel position at passport Business Engineering GmbH. Your company's focus on delivering IT solutions for the food and beverage industry, particularly in logistics, data management, and e-commerce, aligns with my technical background in building and supporting complex systems.

My professional experience includes over four years of full-stack development and IT support, where I have worked extensively with Laravel, Next.js, and MySQL. I have managed user authentication, role-based access control, and database optimization in production environments. I am comfortable working with ticket systems and providing application support to both internal teams and external clients.

One area that particularly interests me is the upcoming S/4 HANA migration and interface management mentioned in the job description. Through my work on multi-vendor e-commerce and real-time monitoring systems, I have gained practical experience in managing data flows, integrating third-party services, and maintaining system reliability during transitions. I am confident I can contribute to the migration and support tasks within your SAP team.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application, and I look forward to the opportunity to discuss how I can support your logistics and IT operations.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
