I am writing to apply for the Mitarbeiter SAP-Support position at passport Business Engineering GmbH. Your client's focus on building powerful systems for logistics, process control, data management, and e-commerce in the food and beverage industry is impressive. I am particularly interested in contributing to the S/4 HANA migration and supporting the hosted logistics systems within your SAP team.

Through my professional experience as a Web Developer, I have developed strong IT affinity and a structured approach to problem-solving. I have worked extensively with MySQL databases, REST APIs, and complex system integrations, which has given me a solid foundation for understanding data flows and interface management in enterprise environments. My experience with ticket systems and documentation aligns well with the operational support responsibilities described in this role.

One area that particularly interests me is the interface management and migration work involved in the S/4 HANA transition. In previous projects, I have managed database migrations, API integrations, and system upgrades, always maintaining data integrity and minimizing downtime. I am comfortable working with structured data, understanding physical logistics processes like warehousing and inventory management from a systems perspective.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my technical background and problem-solving skills can contribute to your team's success during this important migration phase.

Sincerely,

Md Shahanur Islam Shagor
