I am writing to apply for the Communications & External Affairs Manager position at Education Reform Now Advocacy. Your organization's mission to advance educational equity and support forward-thinking education leaders resonates with me, and I am drawn to the opportunity to help shape messaging and digital campaigns that serve students and families.

My professional experience has been in software engineering, but I have consistently taken on responsibilities that require strong writing, strategic communication, and cross-functional collaboration. I have drafted clear documentation, developed content for digital platforms, and worked closely with designers and stakeholders to align messaging with organizational goals. I am comfortable moving between detailed technical writing and audience-focused communications.

In my previous roles, I have planned and executed digital content strategies, managed social media presence, and tracked performance metrics to inform decision-making. I have experience working with tools like Figma for creative briefs and have collaborated with designers to produce on-brand assets. I am also skilled at analyzing data and iterating on strategy based on insights.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the chance to discuss how my skills in communication, digital strategy, and collaboration can contribute to your team's work.

Sincerely,

Md Shahanur Islam Shagor
