I am writing to apply for the Caretaker position at Claydon High School, part of the Penrose Learning Trust. The opportunity to contribute to creating a safe and welcoming environment for students and staff is something I take seriously.

While my professional background is in software engineering, I have developed strong practical and organizational skills that transfer well to this role. Through hands-on projects and system administration work, I have gained experience in maintenance, repair workflows, contractor coordination, and safety compliance. I am comfortable managing physical tasks and ensuring that all safety records and procedures are kept up to date.

In previous work, I have managed server infrastructure, deployed applications on Linux servers, and maintained hardware systems. These responsibilities required attention to detail, reliability, and the ability to troubleshoot problems under pressure. I approach every task with the same mindset: get it done right, keep things running smoothly, and ensure a safe environment for everyone.

I work effectively across teams and communicate clearly with both technical and non-technical colleagues. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in diverse environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my skills and work ethic can contribute to the Estates Team at Claydon High School.

Sincerely,

Md Shahanur Islam Shagor
