I am writing to apply for the Projektleiter*in / Senior Consultant Technische Beratung Windenergie / BESS position at renerco plan consult GmbH. Your work in shaping the energy transition across wind, solar, grid connection, and sector coupling in Germany and Europe is impressive, and I am interested in contributing to your mission of delivering high-quality planning and consulting solutions.

My background is in software engineering, with a focus on building scalable systems, real-time data processing, and secure communication architectures. Through my work on a real-time server health monitoring dashboard, I developed a system that tracked the availability, latency, and performance of multiple target URLs simultaneously, streaming live metrics to the browser using Socket.IO. This experience in building tools for monitoring and analysis is directly relevant to the project review, due diligence reporting, and risk assessment responsibilities outlined in this role.

In previous professional experience as a Web Developer, I designed and developed scalable web applications using Laravel and Next.js, built and integrated RESTful APIs, and implemented authentication, role-based access control, and secure payment gateways. I also deployed and maintained applications on Linux servers with Nginx, Docker, and CI/CD pipelines, which required careful evaluation of system performance, security, and reliability. These skills in assessing technical systems, identifying risks, and implementing solutions translate well to evaluating wind park and battery storage projects.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can support your team’s work in renewable energy consulting.

Sincerely,

Md Shahanur Islam Shagor
