I am writing to apply for the CRM Lead (Top 1%) role at FINE DINE Verlags GmbH. Your mission to transform CRM into a true retention machine for a rapidly scaling D2C business is exactly the kind of challenge I want to take on. The combination of data-driven strategy, AI-first execution, and full ownership of the customer lifecycle is what draws me to this position.

What stands out to me is the emphasis on building systems that systematically capture customer insights, feedback, and satisfaction metrics. In my work as a Full-Stack and AI Engineer, I have developed platforms that integrate AI assistants for data processing and automation. For example, I built an AI-powered financial application where I trained AI models on custom datasets to provide intelligent assistance, and integrated voice-to-text transcription and automated PDF generation. This experience in creating automated, data-driven workflows is directly relevant to building your CRM systems for NPS, CSAT, and customer feedback analysis.

A relevant example is my work on the AI Powered Real Estate platform, where I implemented role-based authentication, subscription plans, and payment integration with Stripe. I also integrated AI for image processing and trained multiple AI assistants. This project required me to own the full technical stack, from API development to deployment, and to think strategically about user journeys and retention. The same mindset applies to your need for a CRM Lead who can own the entire setup, from campaigns and flows to segmentation and customer insights.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background in building intelligent, data-driven systems can help FINE DINE build a world-class CRM and retention machine.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
