I am writing to apply for the IT Systemadministrator position at Clausohm-Software GmbH. Your company's focus on complex IT solutions for automation processes and web-based applications aligns well with my technical background in systems administration and infrastructure management.

Through my professional experience, I have developed strong skills in Linux system administration, database management, and infrastructure maintenance. I have worked extensively with Linux servers, configuring and managing Nginx and Apache web servers, and ensuring high system availability through proactive monitoring and troubleshooting. My experience includes working with databases such as MySQL, MongoDB, and PostgreSQL, which directly matches your requirements for database management.

In previous roles, I have been responsible for planning, implementing, and maintaining IT infrastructure. I have deployed and managed applications using Docker and Kubernetes, set up CI/CD pipelines for streamlined development workflows, and configured monitoring solutions to ensure system reliability. I am comfortable working with cloud platforms including AWS and Google Cloud, and have experience with virtualization and containerization technologies.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my hands-on experience with Linux systems, databases, and infrastructure management would allow me to contribute effectively to your team. I have attached my CV for your review and welcome the opportunity to discuss how I can support Clausohm-Software GmbH's IT operations.

Sincerely,

Md Shahanur Islam Shagor
