I am writing to apply for the Werkstudent Medieninformatik & AI position at mtc commerce GmbH. Your approach to using AI not just for generating individual images but as a systematic tool for developing product ideas and design directions aligns directly with how I think about applied AI.

Through my project work, I have built AI-powered systems that go beyond simple prompt-and-output workflows. I developed an AI-powered real estate platform where I integrated OpenAI and Replicate APIs to create intelligent assistants capable of analyzing properties, processing images, and generating insights. This required systematic prompting, iterative testing, and continuous refinement of both prompts and model outputs to achieve reliable, high-quality results.

In another project, I built an AI-powered financial application that uses OpenAI's latest models trained on custom datasets. The system handles voice-to-text transcription via AWS Transcribe, generates PDF documents automatically, and provides intelligent financial assistance. This experience taught me how to structure AI workflows for efficiency, evaluate model outputs critically, and iterate quickly based on real-world feedback.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am genuinely curious about how AI can transform creative and product development processes, and I would welcome the opportunity to contribute to your team's work with KAZAI. I have attached my CV for your review and look forward to discussing how I can support your AI-driven design workflows.

Sincerely,

Md Shahanur Islam Shagor
