I am writing to apply for the Werkstudent Online Marketing - Schwerpunkt Recruiting position at Strˆ¶er X GmbH. Your focus on practical experience, flexible working, and exposure to multiple recruiting channels aligns well with my approach to learning and contributing in a hands-on environment.

While my primary background is in software engineering, I bring strong digital competence and a structured, analytical mindset that is directly applicable to marketing campaign analysis and optimization. I am comfortable working with data, identifying trends, and using digital tools to drive decisions.

In my professional experience as a Web Developer, I worked closely with teams, managed tasks independently, and communicated clearly with both technical and non-technical stakeholders. I am used to taking ownership of my work and learning new domains quickly.

I am currently pursuing a Bachelor’s in Software Engineering, which has strengthened my ability to analyze complex information, work with KPIs, and approach problems systematically. I am available for up to 20 hours per week and can start immediately.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and look forward to the possibility of contributing to Strˆ¶er X GmbH.

Sincerely,

Md Shahanur Islam Shagor
