I am writing to apply for the Growth Marketing Specialist (m/w/d) position at VDB Digital GmbH. Your focus on delivering high-impact results for B2B software and IT companies through SEO, content, and performance-driven strategies aligns with my technical background and my approach to building systems that produce measurable outcomes.

While my professional experience is rooted in full-stack web development and AI engineering, this technical foundation is directly relevant to the role. I have spent years building and optimizing web applications using Laravel, Next.js, and React, which has given me a strong understanding of website architecture, performance optimization, and the technical factors that influence search rankings and user experience. I know how to analyze a website from both a development and a marketing perspective, identifying opportunities to improve speed, structure, and content delivery.

One area that particularly interests me is the intersection of AI and search. I have worked extensively with AI technologies, including integrating OpenAI and Replicate APIs into full-stack applications. Through my work on the AI Powered Financial App, I built AI assistants and trained models using custom datasets, giving me practical experience with LLMs and AI-driven content systems. This background positions me well to contribute to your work with AI Search, LLMs, and AI Overviews.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my technical and AI experience can support VDB Digital’s growth and client success.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
