I am writing to apply for the (Senior) Social Media Manager position at gocomo GmbH. While my professional background is in software engineering, the strategic thinking, project coordination, and data-driven decision-making required in this role align well with my experience delivering complex technical projects.

In my work as a full-stack developer, I have planned and executed multi-phase projects from concept to deployment, coordinating with designers, backend engineers, and external partners. This has given me strong project management skills and the ability to bring structure to complex workflows.

A relevant example is the Multivendor E-commerce Management Ecosystem, where I coordinated across customer, seller, and logistics modules, ensuring smooth integration and timely delivery. This required clear communication with stakeholders and continuous alignment on priorities.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project management and strategic planning experience can contribute to gocomo GmbH.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
