I am writing to apply for the Senior Performance Marketing Manager â Social Paid (Meta Focus) role at KoRo Handels GmbH. Your focus on scaling new customer growth through a creative-first, data-driven approach to social paid channels is a challenge I find compelling.

My background is in software engineering, where I have spent over four years building full-stack web applications and data-driven platforms. In my professional experience, I have worked extensively with analytics, performance metrics, and system optimization. I have designed and implemented real-time monitoring dashboards that track key performance indicators, latency, and availability, enabling teams to make data-informed decisions quickly. This experience has given me a strong foundation in working with large datasets, deriving actionable insights, and continuously improving system efficiency.

One area that particularly interests me is the structured testing and iteration of performance creatives. In previous work, I have built and deployed platforms that required rigorous A/B testing, user behavior analysis, and iterative optimization. I am comfortable designing experiments, analyzing results, and scaling what works. I also have experience collaborating closely with cross-functional teams, including product, content, and analytics, to align on goals and drive measurable outcomes.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
