I am writing to apply for the SAP AMS Presales Consultant role at Recruit 121 Group. The opportunity to shape modern SAP service portfolios and work as a bridge between sales, delivery, and clients aligns well with my technical background and communication-focused approach.

In my professional experience as a Web Developer, I have worked closely with stakeholders to understand requirements, design solutions, and present technical concepts clearly. I am comfortable translating client needs into structured proposals and collaborating with engineering teams to ensure delivery aligns with expectations.

One area that particularly interests me is the chance to contribute to the development and standardization of service portfolios. I bring a structured, independent working style and enjoy taking ownership of concepts from initial idea through to documentation and presentation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
