I am writing to apply for the Junior Illustrator role at Twine. This project involves creating a cohesive set of isometric illustrations from photographs, and I am interested in contributing to this creative work.

While my background is primarily in software engineering, I have hands-on experience with design tools such as Figma and have built visually consistent, responsive interfaces using Tailwind CSS and MaterialUI. I understand the importance of maintaining visual harmony and precision across a set of assets, which directly applies to creating cohesive illustration sets.

In my professional experience as a Web Developer, I have worked on projects that required careful attention to visual detail, consistency across multiple screens, and collaboration with design teams to ensure the final output matched the intended look and feel. I am comfortable iterating on visual elements based on reference material and feedback.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
