I am writing to apply for the Overnight Emergency Imaging Radiologist position at Orlando Health Medical Group. While my background is in software engineering rather than clinical radiology, I bring strong technical skills in building reliable, real-time systems that support high-volume diagnostic environments.

Through my professional experience as a Web Developer, I have designed and deployed scalable applications using Laravel, Next.js, and Node.js, with a focus on API development, authentication, and database optimization. I have worked extensively with Linux servers, Docker, Nginx, and CI/CD pipelines to ensure system stability and uptime.

One area that particularly interests me is real-time data processing and monitoring. I built a full-stack server health monitoring dashboard using Node.js, Socket.IO, and Docker that streams live system metrics to the browser. This project required reliable uptime, low-latency data delivery, and secure access control, skills that translate well to supporting PACS and imaging workflows.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my technical background can support Orlando Health Medical Group’s imaging operations.

Sincerely,

Md Shahanur Islam Shagor
