I am writing to apply for the Social Creative Lead Real Time & Reactive role at Airbnb. Your approach to real-time storytelling and cultural participation is something I find genuinely compelling. Airbnb's ability to show up in culture with speed and authenticity sets a high bar, and I would welcome the chance to contribute to that work.

My background is in software engineering, where I have spent years building systems that require real-time responsiveness, cross-functional coordination, and quick iteration. Whether shipping features under tight deadlines or collaborating across design, product, and operations teams, I have learned to balance speed with judgment. I am comfortable making decisions with incomplete information and refining them as new context emerges.

In previous work, I have built full-stack platforms that demanded fast content delivery, live updates, and seamless user experiences. I have worked closely with stakeholders to move ideas from concept to execution quickly, while maintaining brand integrity and technical reliability. These experiences have given me strong instincts for prioritization, tone, and timing.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
